SUN UMBRELLA STANDS

MOVELAR & TUOZI

Since 20 years from now, our company develops new solutions for sun-umbrella bases, taking advantage of our concrete production experience since 1979 and the R&D resources, responsible for all MOVELAR products and brands.

Combining a solid experience in concrete production, with injected polypropylene or blown polyethylene, our Research & Development team, created a wide range of solutions for sustaining your umbrella, meeting requirements for both domestic use or the specific HORECA channel.

Innovation and market demand lead us to develop products that better meets its functions and clearly have added value both aesthetic and functionality.

From low weight solutions for water or sand filling, to medium weight bases for the DIY market to concrete high weight and customized solutions for the larger HORECA umbrellas.

High quality finishing with customized possibilities (both on color, surface or branded product), high performance concrete meets design and functionality, resulting in a product that is so much more than a simple weigh to stand your umbrella. It's a base statement, for your outdoor or garden furniture!

0418 | IB00414 ■ GAZEBO

Sun Umbrella Stand | 7L

 0,8 Kg  250 x 320h mm  25 - 32 cmm
